9. PAPER AND PAPER PRODUCTS
10. OIL AND OIL SEEDS
11. SURGICAL UTILITIES
12. ANIMAL FEED
13. CHEMICALS
14. TEXTILES AND TOWELS

Taste The Earth's Best Kept Secrets.

DRY RED CHILLI AND POWDER

Bring life to your recipes with our 100% Pure Red Chilli Powder. We use a specialized low-temperature grinding process to ensure that the natural flavor and capsaicin (heat) are not lost during processing.

WHITE AND BLACK PEPPER

Sourced from the sun-drenched vines of the finest plantations, our Black Pepper is the gold standard of spices.

CINAMMON AND POWDER

Our Cinnamon sticks are sourced from the finest bark, hand-rolled and naturally dried to preserve their intense woody aroma and sweet-spicy flavor.

CORIANDER SEEDS AND POWDER

Our premium Coriander Seeds are harvested from the finest fields, ensuring a bold, golden-green color and a zesty, citrus-like aroma.

CARDAMOM

Known as "True Cardamom," it is most common and used in desserts, chai tea, and curries.

FENNEL SEEDS AND POWDER

Crunchy, pale green to yellowish-brown seeds with a sweet, anise-like flavor.

TAMARIND AND TAMARIND PASTE

A thick, paste-like, dark brown substance made by boiling, straining, and reducing the fruit pulp to remove seeds and fibrous pods.

BAY LEAVES

Aromatic, elliptical, 1–4 inch long, olive-green leaves from the laurel plant (*Laurus nobilis*) used dried as a culinary herb to add savory, pungent, and slightly bitter flavors to soups, stews, and braised dishes.

CUMIN SEEDS AND POWDER

A free-flowing, brownish-yellow powder produced by grinding dried, sometimes roasted, cumin seeds.

SESAME SEEDS

Major types include white (often hulled), black, and natural/unhulled. White seeds are often used in cooking, while black seeds are used in traditional medicine and in many other culinary preparations and herbal treatments.

GARLIC AND GARLIC PASTE

A bulbous root vegetable in the Amaryllidaceae family, consisting of a papery outer skin enclosing several cloves.

ASAFOETIDA CAKE AND POWDER

When cooked in oil or ghee, the harsh aroma mellows into a pleasant, savory flavor similar to sautéed leeks or garlic.

TURMERIC FINGER AND POWDER

Turmeric fingers are the dried, slender, finger-like rhizomes of the *Curcuma longa* plant, known for their deep yellow-orange color, pungent aroma, and 2-5% curcumin content.

DRY GINGER AND POWDER

Dry ginger powder (Saunth/Sunth) is a fine, off-white to brownish powder made from ground, dehydrated ginger rhizomes, featuring a strong, warm, and pungent flavor.

KOKUM

Kokum (*Garcinia indica*) is a small, deep-purple tropical fruit native to India's Western Ghats, renowned for its tangy-sweet flavor and powerful souring properties.

STAR ANISE

Unlock the secret to rich, restaurant-style cooking with our premium Star Anise. Sourced from the finest spice plantations, each pod is hand-selected to ensure you get beautiful, whole stars not broken fragments.

CLOVES

Unlock the powerful flavor of our Premium Hand-Picked Cloves. Sourced from the finest evergreen trees, our cloves are known for their plump, oily heads and rich dark-brown color.

MUSTARD SEEDS

Mustard seeds are small, round, pungent spice seeds from Brassica plants (black, brown, or white), primarily used for culinary tempering, oil production, and condiments.

OREGANO

Oregano (*Origanum vulgare*) is a hardy, aromatic perennial herb in the mint family, famous for its small, oval, olive-green leaves and pungent earthy flavor.

KESAR

Indulge in the sheer luxury of our Premium Kesar (Saffron). Hand-harvested with extreme care, our saffron consists only of the finest deep crimson stigmas (Mongra), free from yellow styles or waste.

GARAM MASALA

Transform your everyday meals into a royal feast with our authentic Garam Masala. Crafted from a traditional recipe passed down through generations, this blend is a perfect symphony of over premium spices.

NUTMEG & ALMONDETTE SEEDS

Sourced from lush tropical plantations, each nut is sun-dried to preserve its heavy, oil-rich center. Unlike pre-ground powder which loses flavor quickly, our whole Nutmeg acts as a "flavor vault."

Health served in pulses

SPLIT YELLOW LENTILS

Yellow Moong Dal (Split Yellow Mung Beans) is made from dehusked and split mung beans, known for its light texture and easy digestibility. It is widely used in soups, khichdi and dal preparations across India.

SPLIT RED LENTILS

Masoor Dal (Red Lentils) is a popular lentil known for its quick cooking time and soft texture. It has a mild, earthy flavor and is widely used in soups, curries and everyday dal dishes.

PIGEON PEA LENTILS

Arhar Dal (Pigeon Pea Lentils). Tur dal is a staple lentil widely used in Indian cooking, known for its rich flavor and thick texture when cooked. It is commonly used in dishes like sambar, dal fry, and everyday curries.

BLACK GRAM LENTILS

Urad Dal (Black Gram Lentils) is a protein-rich lentil widely used in Indian cuisine for dishes like dal makhani, idli and dosa. It has a rich, earthy flavor and becomes creamy when cooked.

SPLIT BENGAL GRAM

Chana Dal (Split Bengal Gram) is made from split and dehusked desi chickpeas, known for its rich, nutty flavor and firm texture. It is widely used in dals, curries, soups, and savory snacks across Indian cuisine.

SPLIT RED LENTILS

Masoor Dal (Red Lentils) is a nutritious lentil known for its quick cooking time and soft, creamy texture. It has a mild earthy flavor and is commonly used in soups, curries, and everyday dal dishes.

HILL HORSE GRAM

Pahadi Kulthi Dal (Hill Horse Gram) dal is a traditional horse gram variety grown in hilly regions, valued for its high protein and fiber content. It is widely used in soups, rasam and medicinal diets for its warming and therapeutic properties.

BROAD BEANS LENTILS

Bakla Dal (Fava Beans / Broad Beans) is made from split and dehusked fava beans, known for its rich, earthy flavor and creamy texture when cooked. It is used in traditional dals, curries, and regional dishes for its high protein and fiber content.

TEPARY BEANS DAL

Tepary Bean Dal (Tepari Dal) is a rare pulse known for its high protein, fiber, and mineral content. It has a slightly nutty flavor and is valued for its drought resistance and nutritional benefits.

GARBANZO BEANS

Kabuli Chana (Chickpeas / Garbanzo Beans) they are large, cream-colored chickpeas known for their nutty flavor and firm texture. They are widely used in dishes like chole, hummus, salads, and curries.

KASHMIRI KIDNEY BEANS

Kashmiri Rajma (Kashmiri Kidney Beans) are small, dark red kidney beans known for their rich flavor and creamy texture when cooked. They are widely used in traditional rajma curry and Kashmiri dishes.

GREEN GRAM

Green Gram (Mung Beans) also known as mung beans, is a nutrient-rich pulse valued for its high protein, fiber, and antioxidant content. It is commonly used whole, sprouted, or split into moong dal for various dishes.

BLACK EYED PEAS

Black-Eyed Peas (Lobia / Cowpeas) they are cream-colored beans with a distinctive black "eye" spot, known for their mild, nutty flavor. They are rich in protein, fiber and essential minerals making them highly nutritious.

YELLOW PEAS

Yellow Peas (Dried / Split Yellow Peas) are dried field peas known for their mild, earthy flavor and firm texture. They are rich in protein, fiber, and essential nutrients, making them highly nutritious. Commonly used in soups, curries, and dishes like ragda.

WHITE PEAS

White Peas (Dried White Peas / Safed Matar) are dried field peas known for their mild flavor and soft texture when cooked. They are rich in protein, fiber, and carbohydrates, making them a filling and nutritious pulse. Commonly used in dishes like ragda, curries, and street foods.

HORSE GRAM

Kulthi Bean (Horse Gram) also known as horse gram, is a nutrient-dense pulse rich in protein, fiber, and iron. It is widely used in traditional soups, rasam, and medicinal diets for its warming and therapeutic properties.

MOTH BEANS

Math Beans (Moth Beans) are small, brown pulses known for their rich protein, fiber, and mineral content. They have a nutty flavor and are commonly used in dals, curries, and sprouted dishes like misal and usal.

COWPEA RED

Red Cowpea (Red Lobia / Lal Lobia) is a nutrient-rich pulse known for its reddish-brown color and earthy flavor. It is high in protein, fiber, and essential minerals, supporting digestion and overall health.

BLACK SOYABEAN

Black Soyabean is a nutrient-dense legume rich in protein, fiber, and antioxidants. It has a slightly sweet, nutty flavor and is widely used in traditional dishes, fermented foods, and health diets.

MAIZE

Maize, also known as corn, is a widely grown cereal grain valued for its versatility and nutritional content. It is rich in carbohydrates, fiber, and essential vitamins, making it a major staple food. Maize is used in flour, snacks, animal feed, and various food products worldwide.

GROUNDNUT

Groundnut (Peanut) also known as peanut, is an oilseed crop rich in protein, healthy fats, and essential nutrients. It is widely used for making edible oil, snacks, peanut butter, and traditional dishes. Groundnut supports heart health and provides a good source of energy.

SOYABEAN

Soyabean is a protein-rich legume widely used for food, oil extraction, and animal feed. It is packed with essential amino acids, fiber, and healthy fats, making it highly nutritious. Soyabean is used to make products like tofu, soy milk, and soybean oil.

Elevating Fruit Indulgence

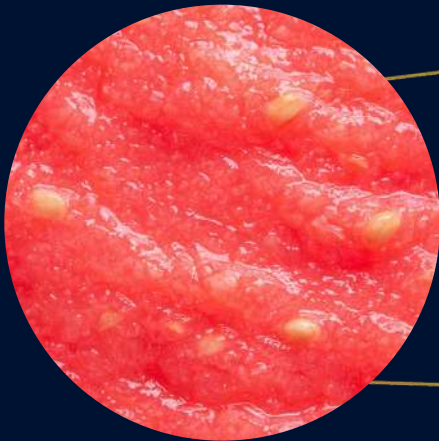

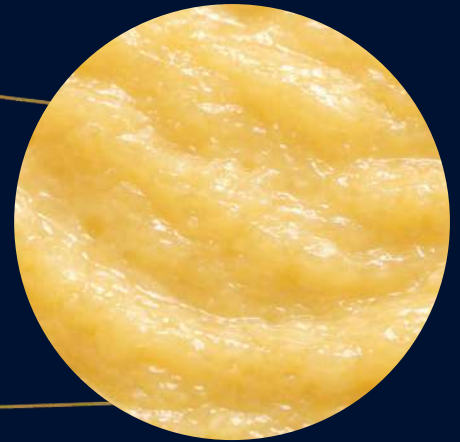

MANGO PULP

Our mango pulp is made from carefully selected ripe mangoes, delivering rich taste, natural sweetness and smooth texture. Processed from premium quality mangoes, our pulp offers authentic flavor, vibrant color, and consistent quality for beverages and culinary use.

BANANA PULP

Banana pulp is a smooth, creamy paste made from ripe bananas, known for its naturally sweet taste and rich aroma. It has a thick consistency and pale yellow color. Packed with potassium and energy-boosting carbohydrates, banana pulp is both nutritious and versatile.

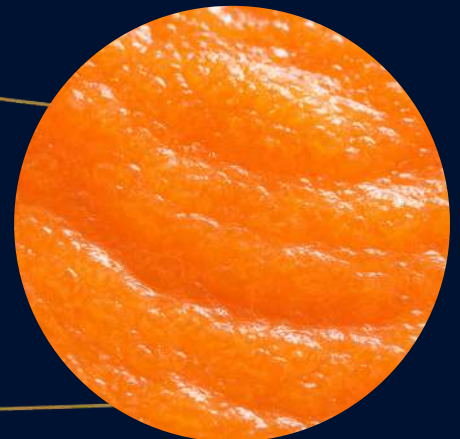

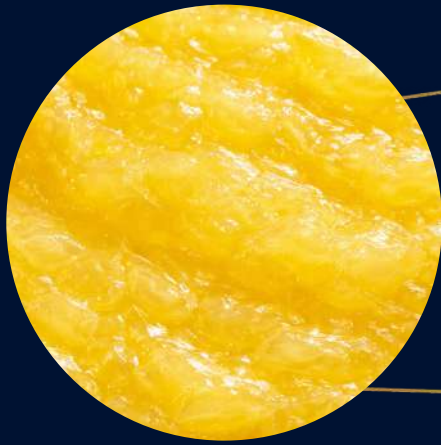

GUAVA PULP

Guava pulp is a thick, aromatic puree made from ripe guavas, known for its sweet tangy flavor and rich tropical taste. It has a smooth texture with a vibrant pink or creamy white color, depending on the variety. Guava pulp is rich in vitamin C and antioxidants.

PAPAYA PULP

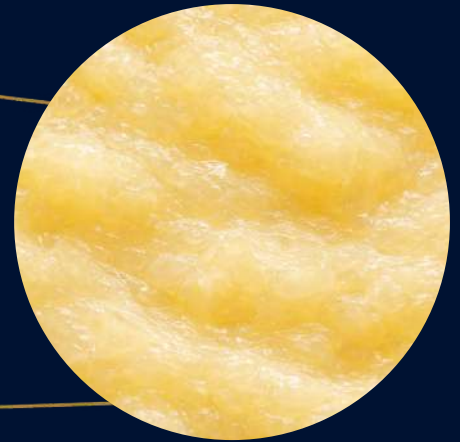

Papaya pulp is a smooth, vibrant orange puree extracted from ripe papaya fruit, known for its naturally sweet taste and rich aroma. It is widely used in beverages, desserts, baby foods, and bakery products due to its soft texture and high nutritional value. Rich in vitamins A & C and antioxidants.

PINEAPPLE PULP

Our pineapple pulp is made from fresh, juicy pineapples, offering a perfect balance of sweetness and tanginess. Smooth in texture and rich in flavor, it is ideal for juices, desserts, and food processing applications. Pure tropical freshness packed for year round use.

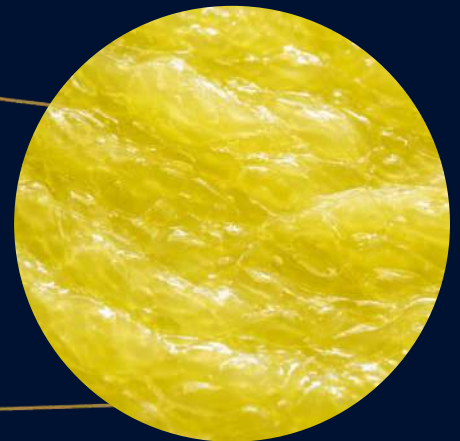

APPLE PULP

Our apple pulp is made from fresh, carefully selected apples, offering natural sweetness and smooth texture. Ideal for juices, desserts, sauces, and bakery applications. Processed hygienically to retain real fruit flavor and quality.

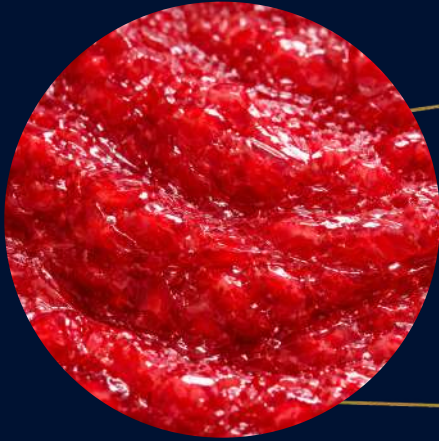

ORANGE PULP

Our orange pulp is made from freshly selected juicy oranges, delivering a perfect balance of tangy sweetness and natural aroma. With its vibrant color and refreshing flavor, it is ideal for juices, beverages, and dessert preparations.

SWEET LIME PULP

Our sweet lime pulp is extracted from fresh, carefully selected fruits to deliver a mild, refreshing taste and natural citrus aroma. With its smooth texture and balanced sweetness, it is perfect for juices, beverages, and food processing applications.

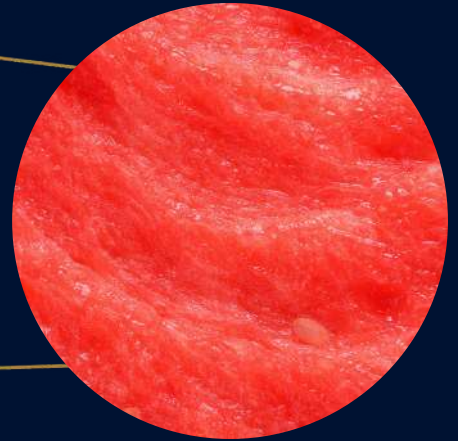

POMEGRANATE PULP

Our pomegranate pulp is crafted from carefully selected ripe fruits, offering a rich ruby color and naturally sweet tart flavor. Packed with freshness and vibrant taste, it is perfect for juices, beverages, and culinary applications.

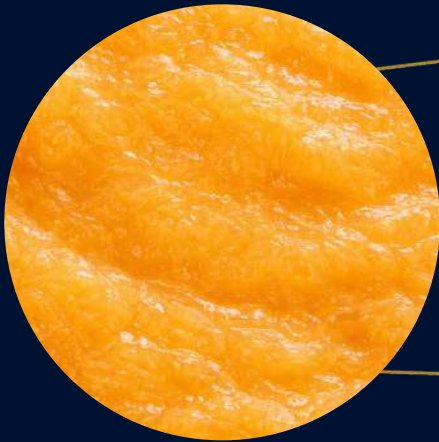

WATERMELON PULP

Our watermelon pulp is made from fresh, ripe watermelons, offering a naturally sweet taste and refreshing flavor. With its vibrant color and smooth texture, it is perfect for juices, beverages, and summer-based food applications.

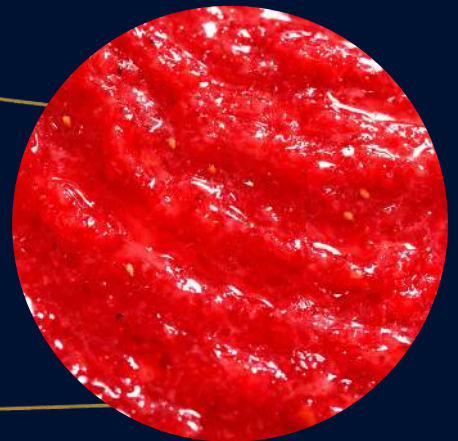

MUSKMELON PULP

Our muskmelon pulp is made from carefully selected ripe muskmelons, offering a naturally sweet taste and refreshing aroma. Smooth in texture and rich in flavor, it is perfect for beverages, desserts, and culinary preparations.

STRAWBERRY PULP

Our strawberry pulp is made from ripe, hand picked strawberries, offering a rich color, sweet taste, and natural aroma. Its smooth texture makes it perfect for beverages, desserts, and confectionery applications.

CHIKOO PULP

Our chikoo pulp is made from fully ripened sapota fruits, offering a naturally sweet taste and smooth creamy texture. Rich in flavor and freshness, it is perfect for milkshakes, desserts, and food processing applications.

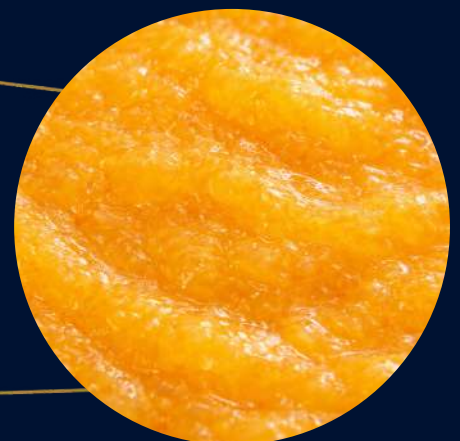

CUSTARD APPLE PULP

Our custard apple pulp is crafted from ripe, handpicked fruits, offering a rich creamy texture and naturally sweet flavor. Its authentic taste and smooth consistency make it perfect for desserts, shakes, and premium food preparations.

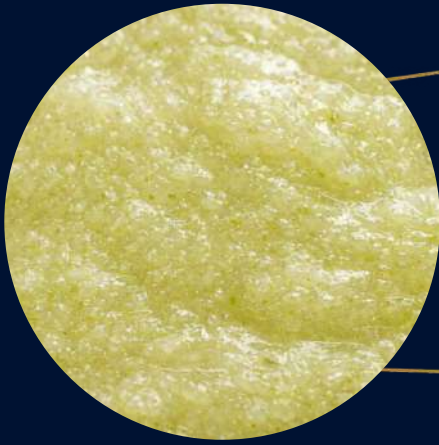

JACKFRUIT PULP

Our jackfruit pulp is made from fully ripe, carefully selected jackfruits, offering rich sweetness and a distinctive tropical flavor. Its thick texture and natural aroma make it perfect for desserts, beverages, and processed food products.

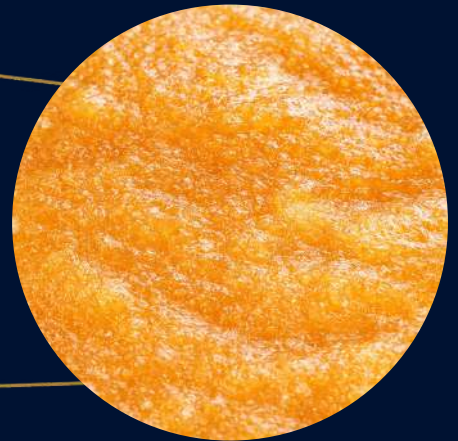

PEACH PULP

Our peach pulp is crafted from ripe, handpicked peaches, offering a smooth texture and naturally sweet flavor. Its rich aroma and vibrant taste make it perfect for juices, desserts, and beverage applications.

PEAR PULP

Our pear pulp is made from carefully selected ripe pears, offering a naturally sweet taste and smooth texture. With its delicate flavor and fresh aroma, it is perfect for beverages, desserts, and food processing applications.

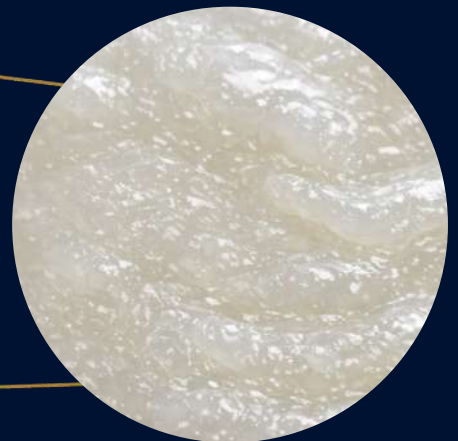

APRICOT PULP

Our apricot pulp is crafted from ripe, carefully selected apricots, offering a naturally sweet taste with a mild tangy note. Its rich texture and vibrant flavor make it perfect for juices, desserts, and bakery applications.

PLUM PULP

Our plum pulp is crafted from ripe, carefully selected plums, offering a rich color and naturally sweet tangy flavor. Smooth in texture and full of freshness, it is perfect for beverages, desserts, and food processing applications.

LYCHEE PULP

Our lychee pulp is crafted from handpicked ripe lychees, offering a delicate floral aroma and naturally sweet taste. With its smooth texture and exotic flavor, it is perfect for beverages, desserts, and premium food applications.

PASSION FRUIT

Our passion fruit pulp is crafted from ripe, aromatic fruits, offering a bold tangy flavor and natural tropical fragrance. Its rich texture and vibrant taste make it perfect for juices, cocktails, desserts, and gourmet applications.

TOMATO

Our tomato pulp is made from vine ripened tomatoes, offering rich color, natural flavor, and smooth consistency. Ideal for sauces, ketchups, soups, and food processing applications.

Dried to Delight. Exported Right

DEHYDRATED MANGO

Our dehydrated mango is made from premium ripe mango slices, carefully dried to retain natural sweetness and rich flavor. It offers a chewy texture and long shelf life, making it perfect for snacking, baking, and food processing.

DEHYDRATED CHERRY

Our dehydrated cherries are made from premium ripe fruit, carefully dried to preserve their rich flavor and natural sweetness. Perfect for snacking, baking, cereals, and confectionery applications.

DEHYDRATED APPLE

Our dehydrated apple is made from carefully selected fresh apples, gently dried to preserve natural sweetness and flavor. It offers a chewy texture and long shelf life, making it perfect for snacks, baking, and food processing applications.

DEHYDRATED PINEAPPLE

Our dehydrated pineapple is made from carefully selected ripe fruit, retaining its natural sweetness, tangy flavor, and vibrant color. Perfect for snacking, baking, cereals, and food processing applications.

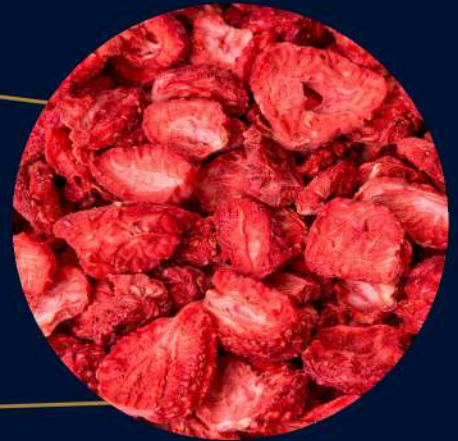

DEHYDRATED PAPAYA

Our dehydrated papaya is made from carefully selected ripe fruit, preserving its natural sweetness, vibrant color, and soft chewy texture. Perfect for snacking, baking, cereals, and food processing applications.

DEHYDRATED STRAWBERRY

Our dehydrated strawberries are made from freshly selected ripe berries, preserving their natural sweetness, vibrant color, and rich flavor. Perfect for snacking, cereals, baking, and food processing applications.

DEHYDRATED BLUEBERRY

Our dehydrated blueberries are made from premium ripe berries, carefully dried to retain their natural sweetness, rich color, and nutrients. Perfect for snacking, baking, cereals, and food processing applications.

DEHYDRATED RASPBERRY

Our dehydrated raspberry is made from carefully selected ripe berries, retaining its natural tangy sweetness, vibrant color, and rich aroma. Perfect for snacking, baking, cereals, and premium food applications.

DEHYDRATED CRANBERRY

Our dehydrated cranberries are made from premium quality fruit, offering a perfect balance of sweet and tangy flavor. Rich in color and natural goodness, they are ideal for snacking, baking, cereals, and food processing applications.

DEHYDRATED BANANA

Our dehydrated banana is made from carefully selected ripe bananas, gently dried to preserve natural sweetness and nutrients. It offers a rich flavor and chewy texture, perfect for snacking, baking, and food processing applications.

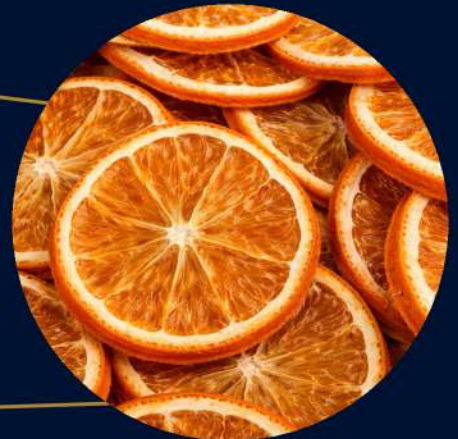

DEHYDRATED GRAPES

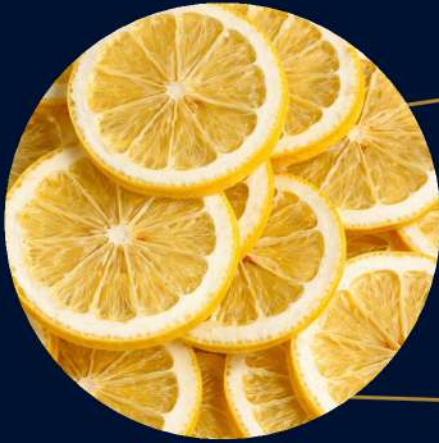

Our dehydrated grapes are carefully dried to preserve their natural sweetness, rich flavor, and chewy texture. Perfect for snacking, baking, cereals, and a wide range of food applications.

DEHYDRATED ORANGE

Our dehydrated orange is made from carefully selected ripe fruit, retaining its natural citrus tang, sweetness, and vibrant color. Perfect for snacking, baking, teas, and food processing applications.

DEHYDRATED LEMON

Our dehydrated lemon is carefully dried to preserve its natural tangy flavor and refreshing citrus aroma. Perfect for beverages, seasoning, and culinary use, it delivers consistent taste and long shelf life in every pack.

DEHYDRATED KIWI

Our dehydrated kiwi is made from carefully selected fresh kiwis, gently dried to preserve their natural sweetness and tangy flavor. With a vibrant color and chewy texture, it is perfect for snacking, baking, cereals, and food applications.

DEHYDRATED FIG

Our dehydrated figs are naturally sweet, soft, and rich in flavor, carefully dried to preserve their nutrients and taste. Perfect for snacking, baking, and premium food applications.

DEHYDRATED GUAVA

Our dehydrated guava is made from carefully selected ripe fruits, preserving its natural sweetness, aroma, and nutrients. With a rich flavor and chewy texture, it is perfect for snacking, baking, and food processing applications.

DEHYDRATED PEAR

Our dehydrated pear is carefully dried to preserve its natural sweetness, soft texture, and rich flavor. Perfect for snacking, baking, and food processing applications, it offers quality and freshness in every bite.

DEHYDRATED APRICOT

Our dehydrated apricots are made from carefully selected ripe fruits, naturally dried to preserve their sweetness, flavor, and nutrients. Soft in texture and rich in taste, they are perfect for snacking, baking, and food processing.

DEHYDRATED PEACH

Our dehydrated peach is made from carefully selected ripe peaches, gently dried to preserve natural sweetness and flavor. It offers a soft texture and rich fruity taste, perfect for snacking, baking, and food processing applications.

DEHYDRATED POMEGRANATE

Our dehydrated pomegranate is made from carefully selected fresh arils, retaining its natural color, tangy sweetness, and nutrients. It is perfect for snacking, bakery, cereals, and culinary applications, offering long shelf life with authentic fruit flavor.

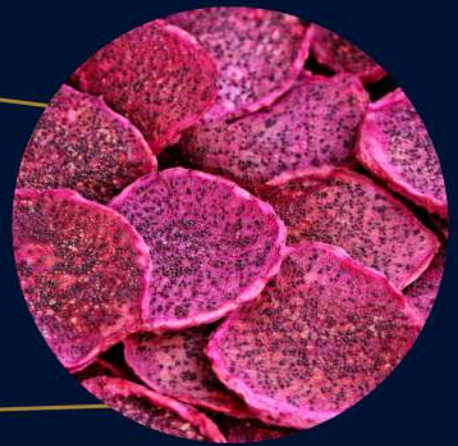

DEHYDRATED COCONUT

Our dehydrated coconut is made from fresh, mature coconuts, carefully dried to retain its natural taste and aroma. It offers a rich texture and long shelf life, making it perfect for bakery, confectionery, and culinary applications.

DEHYDRATED DRAGON FRUIT

Our dehydrated dragon fruit is made from carefully selected fresh fruit, preserving its natural color, mild sweetness, and nutrients. Light, crunchy, and flavorful, it is perfect for snacking, cereals, desserts, and food applications.

From Fields to Global Tables.

WHEAT FLOUR

Our wheat flour is finely milled from premium quality grains, offering a soft texture and natural aroma. Perfect for chapati, bread, and a wide range of bakery applications, it ensures consistent quality and wholesome taste in every batch.

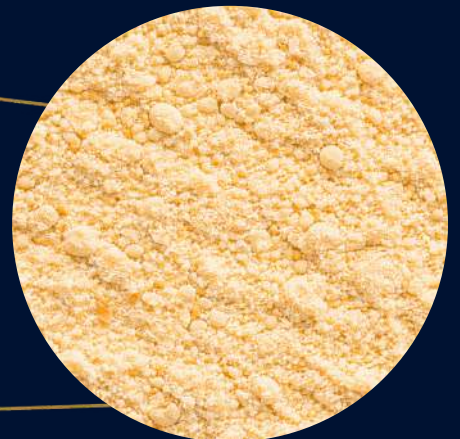

MAIDA

Our maida is finely refined to deliver a smooth, soft texture with excellent consistency. Ideal for bakery products, pastries, and confectionery applications, it ensures lightness and superior results in every preparation.

BESAN

Our besan is finely ground from premium quality chana dal, offering a rich aroma and smooth texture. Perfect for snacks, sweets, and traditional recipes, it delivers authentic taste and consistent quality in every use.

SATTU FLOUR

Our sattu flour is traditionally roasted and finely milled to retain its natural flavor and nutrition. With its earthy aroma and smooth texture, it is perfect for refreshing drinks, wholesome meals, and authentic regional recipes.

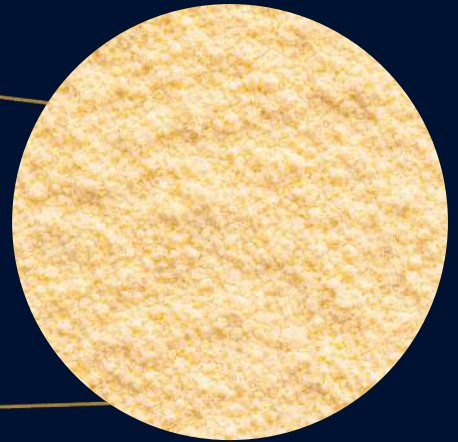

RICE FLOUR

Our rice flour is finely milled from high quality rice, offering a soft texture and clean, neutral taste. Ideal for traditional sweets, snacks, and gluten free recipes, it ensures smooth consistency and reliable performance in every preparation.

CORN FLOUR

Our corn flour is finely processed to deliver a smooth texture and mild, natural flavor. Perfect for thickening soups, sauces, and gravies, it ensures consistent quality and excellent results in every application.

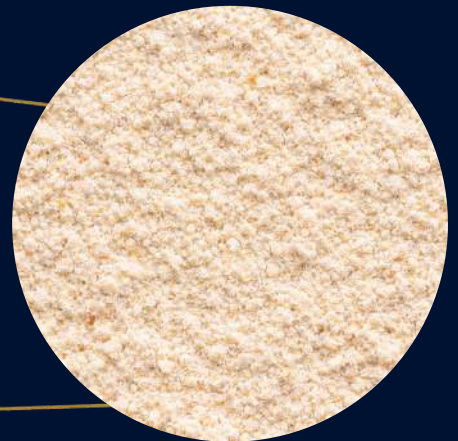

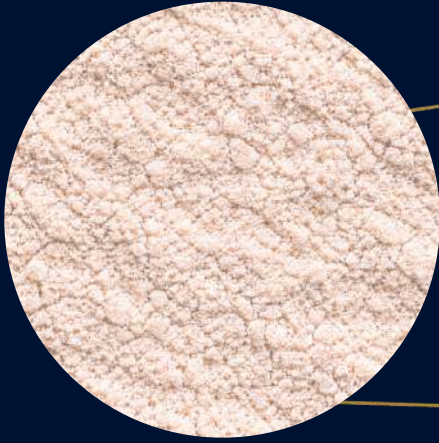

BAJRA FLOUR

Our bajra flour is freshly milled from premium pearl millet, offering a rich earthy flavor and wholesome texture. Ideal for traditional rotis and nutritious recipes, it delivers natural goodness and consistent quality in every serving.

JOWAR FLOUR

Our jowar flour is finely ground from select sorghum grains, delivering a light texture and mild, natural flavor. Ideal for rotis and gluten free recipes, it ensures wholesome nutrition and consistent quality in every preparation.

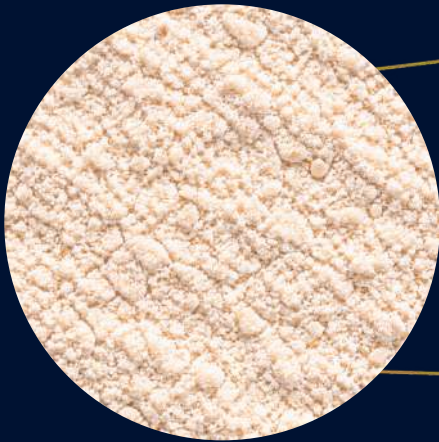

RAGI FLOUR

Our ragi flour is carefully milled from high quality finger millet, offering a rich earthy taste and fine texture. Perfect for healthy rotis, porridges, and baked goods, it delivers natural nutrition and consistent quality in every use.

BARLEY FLOUR

Our barley flour is finely milled from premium barley grains, offering a mild nutty flavor and smooth texture. Ideal for breads, health recipes, and traditional preparations, it ensures wholesome nutrition and consistent quality in every batch.

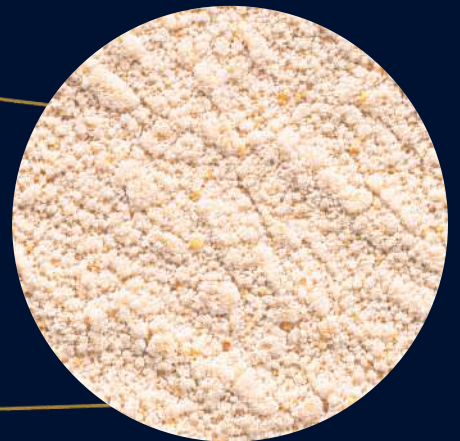

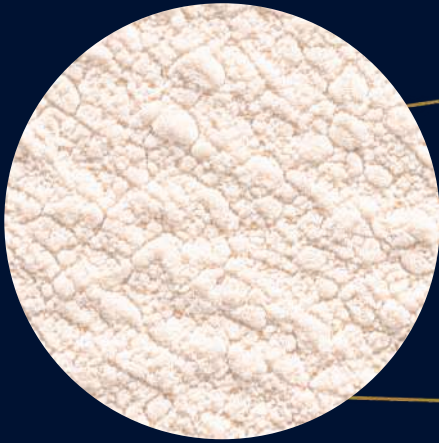

OATS FLOUR

Our oats flour is finely ground from high quality oats, delivering a soft texture and mild, natural flavor. Perfect for baking, smoothies, and healthy recipes, it ensures balanced nutrition and consistent quality in every preparation.

MULTI-GRAIN FLOUR

Our multigrain flour is a balanced blend of carefully selected grains, offering a rich taste and wholesome texture. Ideal for rotis, breads, and everyday meals, it delivers enhanced nutrition and consistent quality in every serving.

SINGHARA FLOUR

Our singhara flour is finely milled from premium water chestnuts, offering a light texture and mild, natural taste. Ideal for fasting recipes and traditional sweets, it ensures purity, smooth consistency, and dependable quality in every preparation.

URAD DAL FLOUR

Our urad dal flour is finely ground from carefully selected lentils, delivering a smooth texture and rich, authentic flavor. Ideal for traditional batters, snacks, and specialty recipes, it ensures consistent quality and excellent results every time.

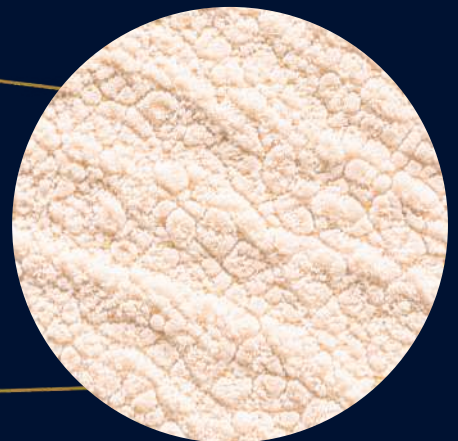

MOONG DAL FLOUR

Our moong dal flour is finely milled from premium green gram, offering a smooth texture and mild, nutty flavor. Perfect for traditional dishes, snacks, and healthy recipes, it delivers consistent quality and wholesome nutrition in every use.

POHA FLOUR

Our poha flour is finely ground from carefully selected flattened rice, offering a light texture and mild taste. Ideal for traditional recipes and innovative food applications, it ensures smooth consistency and reliable quality in every preparation.

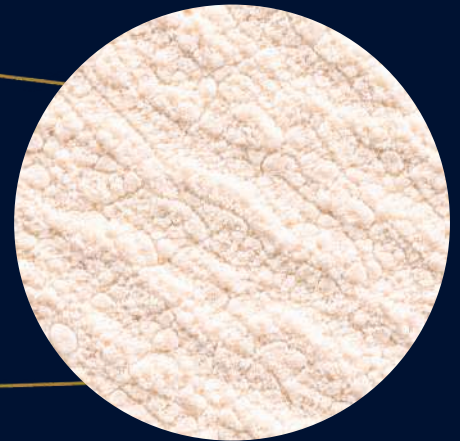

SABUDANA FLOUR

Our sabudana flour is finely processed from premium tapioca pearls, offering a soft texture and neutral taste. Ideal for fasting recipes and traditional dishes, it ensures smooth consistency and dependable quality in every use.

RAJGIRA FLOUR

Our rajgira flour is finely milled from premium amaranth grains, offering a light texture and mildly nutty flavor. Ideal for fasting recipes and healthy preparations, it delivers natural nutrition and consistent quality in every batch.

KUTTU FLOUR

Our kuttu flour is finely ground from carefully selected buckwheat, offering a rich earthy flavor and smooth texture. Ideal for fasting recipes and traditional dishes, it ensures purity, wholesome nutrition, and consistent quality in every preparation.

SOY FLOUR

Our soy flour is finely milled from high quality soybeans, offering a smooth texture and rich protein content. Ideal for baking, fortification, and health focused recipes, it ensures enhanced nutrition and consistent quality in every use.

CORNSTARCH

Our cornstarch flour is finely refined to deliver a light, silky texture and neutral taste. Perfect for thickening soups, sauces, gravies, and desserts, it ensures smooth consistency and reliable performance in every recipe.

RAVA FLOUR

Our rava is carefully milled from high quality wheat, offering a coarse texture and natural flavor. Perfect for upma, halwa, and a variety of traditional dishes, it ensures consistent quality and excellent results in every preparation.

Authentic Sweetness Globally Delivered.

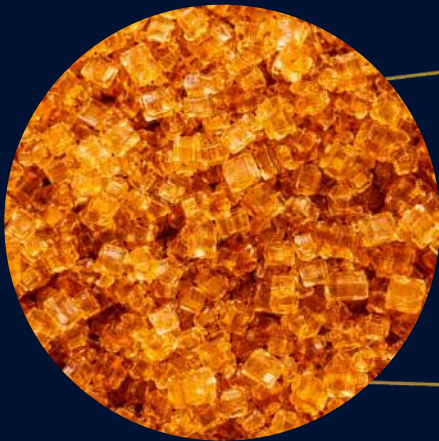

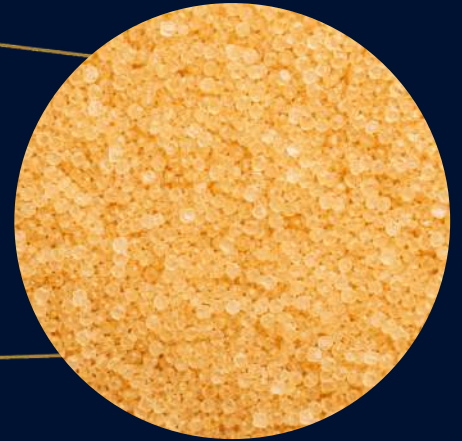

REFINED WHITE SUGAR

Premium refined white sugar produced from high-quality sugarcane, processed under strict quality standards. Known for its pure white color, uniform crystals, and consistent sweetness, ideal for food, beverage, and confectionery industries.

BROWN SUGAR

Premium brown sugar produced from high-quality sugarcane, retaining natural molasses that gives it a rich color and distinctive flavor. Ideal for baking, confectionery, beverages, and gourmet food applications.

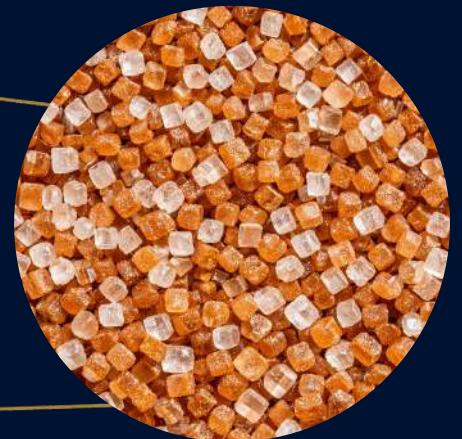

DEMERARA SUGAR

Premium Demerara sugar known for its large golden crystals and natural molasses flavor. Ideal for baking, beverages, and gourmet culinary applications.

TURBINADO SUGAR

Premium Turbinado sugar made from partially refined sugarcane, retaining natural molasses for its light golden color and subtle caramel flavor. Ideal for beverages, baking, and gourmet applications.

MUSCOVADO SUGAR

Premium Muscovado sugar is a natural, unrefined cane sugar rich in molasses, giving it a deep brown color and distinctive flavor. Its moist texture and strong caramel notes make it ideal for baking, confectionery, sauces, and gourmet food applications. Carefully produced to meet international quality standards for global export.

POWDERED SUGAR

Premium powdered sugar is finely milled refined sugar with a smooth, soft texture and exceptional purity. It dissolves instantly, making it ideal for baking, icing, confectionery, and beverage applications. Carefully processed to meet international quality and export standards.

CASTER SUGAR

Premium caster sugar features ultra-fine crystals that dissolve quickly, ensuring a smooth and consistent sweetness. Ideal for baking, beverages, desserts, and confectionery applications. Carefully processed to meet international quality and export standards.

RAW SUGAR

Premium raw sugar is minimally processed cane sugar that retains its natural molasses and light golden color. Known for its rich flavor and coarse crystals, it is widely used in food processing, beverages, and refining applications. Carefully produced to meet international quality and export standards.

COCONUT SUGAR

Premium coconut sugar is a natural sweetener derived from the sap of coconut palm blossoms. Known for its golden-brown color and mild caramel-like flavor, it is widely used in baking, beverages, and health-focused food products. Carefully processed to meet international quality standards for global export.

PALM SUGAR

Premium palm sugar is a natural sweetener produced from the sap of palm trees, known for its rich brown color and distinct caramel-like flavor. Widely used in traditional sweets, beverages, and gourmet culinary applications.

DATE SUGAR

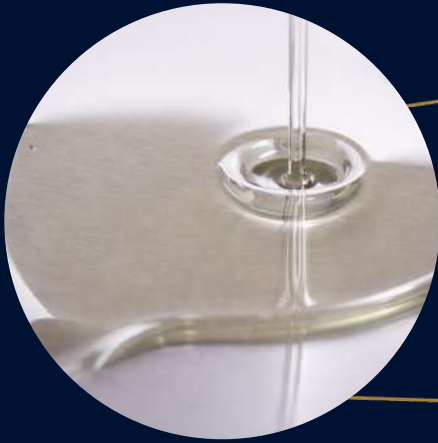

Premium date sugar is a natural sweetener made from finely ground dried dates, offering a rich brown color and a mild caramel-like flavor. It is widely used in baking, cereals, desserts, and health-conscious food products.

BEET SUGAR

Premium beet sugar is a high-quality sweetener extracted from sugar beets and refined to achieve exceptional purity and consistent sweetness. Known for its bright white color and fine crystals, it is widely used in food processing, baking, beverages, and confectionery.

LIQUID SUGAR SYRUP

Premium sugar syrup is a clear, concentrated liquid sweetener produced by dissolving high-quality sugar in purified water. Known for its smooth texture and consistent sweetness, it is widely used in beverages, confectionery, bakery, and food processing industries.

ROCK SUGAR

Premium rock sugar consists of large, transparent sugar crystals formed through a natural crystallization process. Known for its purity, mild sweetness, and elegant crystal structure, it is widely used in beverages, confectionery, and traditional culinary applications.

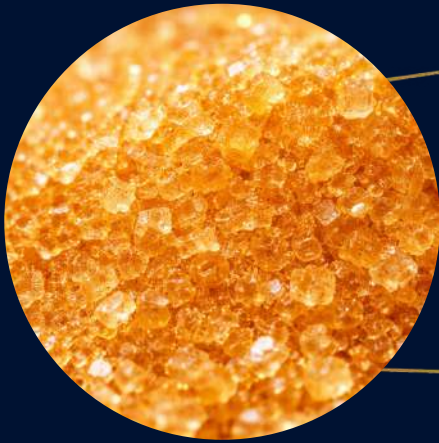

PEARL SUGAR

Premium pearl sugar consists of large, opaque white sugar granules that retain their shape when baked. Known for its crunchy texture and decorative appeal, it is widely used in pastries, waffles, and bakery products.

CANE SUGAR

Premium cane sugar is a natural sweetener derived from high-quality sugarcane, known for its light golden color and pure sweetness. It features uniform crystals and a rich flavor, making it ideal for baking, beverages, and food processing applications.

GOLDEN SUGAR

Premium golden sugar is a lightly refined cane sugar known for its natural golden color and delicate caramel-like flavor. Its fine crystals and balanced sweetness make it ideal for baking, beverages, and gourmet food applications.

JAGGERY

Premium jaggery is a natural, unrefined sweetener made from concentrated sugarcane juice. Known for its rich golden-brown color and deep caramel-like flavor, it is widely used in traditional sweets, beverages, and culinary preparations.

LIQUID JAGGERY

Premium liquid jaggery is a natural sweetener made from concentrated sugarcane juice, known for its rich golden-brown color and smooth, pourable consistency. It offers a deep caramel-like flavor and is widely used in traditional sweets, beverages, and food preparations.

PALM JAGGERY

Premium palm jaggery is a natural, unrefined sweetener made from the sap of palm trees. Known for its dark brown color and rich caramel-like flavor, it is widely used in traditional sweets, beverages, and culinary preparations.

DATE PALM JAGGERY

Premium date palm jaggery is a natural, unrefined sweetener made from the sap of date palm trees. Known for its rich dark brown color and distinctive caramel-like flavor, it is widely used in traditional sweets, beverages, and culinary preparations.

SUGARCANE JAGGERY

Premium sugarcane jaggery is a natural, unrefined sweetener made from concentrated sugarcane juice. Known for its rich golden-brown color and deep caramel-like flavor, it is widely used in traditional sweets, beverages, and culinary preparations.

Comfort served in grains.

1121 BASMATI RICE

1121 Basmati rice is a premium extra-long grain variety, with an average raw grain length of about 8.30–8.50 mm, one of the longest among basmati types. It is known for its rich aroma and fluffy texture. Widely exported, it is valued for its superior grain size, appearance and taste.

1509 BASMATI RICE

1509 Basmati rice is an extra-long grain variety known for its fine texture, pleasant aroma, and non-sticky cooking quality. The average raw grain length ranges from 8.10–8.30 mm.

1718 BASMATI RICE

1718 Basmati rice is a premium extra-long grain variety valued for its strong aroma, slender shape, and excellent cooking performance. The average raw grain length ranges from 8.20–8.40 mm, with impressive elongation and fluffy texture after cooking.

1401 BASMATI RICE

1401 Basmati rice is a high-quality extra-long grain variety known for its pleasant aroma, smooth texture, and reliable cooking results. The average raw grain length ranges from 7.90–8.10 mm.

IR 64 RICE

IR 64 is a widely grown high-yielding rice variety developed by IRRI, known for its good cooking and eating quality. It has medium-slender grains with an average length of about 6.0–6.3 mm.

JASMINE RICE

Jasmine rice is a fragrant long-grain variety mainly grown in Thailand, known for its soft texture and aromatic flavor. It has long, slender grains typically measuring about 6.8–7.5 mm in length.

SONA MASURI RICE

Sona Masuri is a popular medium-grain rice variety widely grown in India, known for its lightweight and soft texture. It has medium-sized grains measuring about 5.0–5.5 mm in length.

NAVARA RICE

Navara rice is a traditional medicinal rice variety from Kerala, valued in Ayurvedic treatments and health foods. It has short to medium grains, typically about 4.0–5.0 mm in length.

PUSA BASMATI RICE

Pusa Basmati rice is a premium long-grain variety known for its pleasant aroma, slender grains, and excellent cooking quality. The average raw grain length ranges from 7.60–7.80 mm.

SUGANDHA BASMATI RICE

Sugandha Basmati rice is a fine long-grain variety known for its mild aroma, smooth texture, and economical pricing compared to premium basmati types. The average raw grain length ranges from 7.40–7.60 mm, with decent elongation and non-sticky results after cooking.

SHARBATI BASMATI RICE

Sharbati Basmati rice is a popular long-grain variety known for its sweet aroma, soft texture, and excellent cooking quality. The average raw grain length ranges from 7.10–7.30 mm, with good elongation and fluffy, non-sticky results after cooking.

ARBORIO RICE

Arborio rice is a short-grain Italian rice known for its high starch content, which gives dishes a creamy texture. It's most commonly used for risotto, as the grains absorb liquid well while remaining slightly firm at the center.

FORBIDDEN RICE

Forbidden rice, also known as black rice, is a nutrient-rich wholegrain with a deep purple-black color. It has a slightly sweet, nutty flavor and is high in antioxidants, making it popular in both savory dishes and desserts.

WILD RICE

Wild rice is a long-grain aquatic grain with a dark brown to black color and a distinctive nutty, earthy flavor. It has a chewy texture and is rich in protein and fiber, making it popular in salads, pilafs, and hearty side dishes.

PARBOILED RICE

Parboiled rice is rice that has been partially boiled in the husk, which helps retain nutrients and gives the grains a firmer texture. It cooks up fluffy and separate, making it ideal for everyday meals, curries and bulk cooking.

JEERA RICE

Jeera rice (seeraga samba) is a traditional South Indian short-grain rice, prized for its tiny grains and rich, natural aroma. Commonly used in biryani and festive dishes, it absorbs flavors well and delivers a soft, slightly fluffy texture when cooked.

KALANAMAK RICE

Kalanamak rice is a traditional aromatic rice variety from India, known for its short grains and distinct earthy fragrance.

GOBINDOBHOG RICE

Gobindobhog is a short-grain, fragrant rice mainly grown in West Bengal. It is commonly used in Bengali dishes like khichuri and sweet preparations. The rice has a buttery aroma and cooks into a soft, sticky texture ideal for traditional recipes.

CHAK HAO RICE

Chak Hao rice is a traditional aromatic black rice from Manipur, India, known for its deep purple-black color. It is rich in antioxidants, fiber, and nutrients, making it a healthy choice.

RED RICE

Red rice is a whole grain variety with a reddish bran layer that gives it a nutty flavor and chewy texture. Commonly used in South Indian and Sri Lankan cuisines, it is valued for both taste and health benefits.

BAMBOO RICE

Bamboo rice is a rare forest-grown grain collected from flowering bamboo shoots, mainly found in parts of South India. It is rich in fiber, protein, and minerals, offering several health benefits.

AMBEMOHAR RICE

Ambemohar rice is a fragrant, short-grain variety from Maharashtra, India, known for its strong mango-like aroma ("Ambe" means mango). It cooks soft and slightly sticky, making it ideal for dishes like khichdi, pulao, and traditional sweets.

Nature's finest coconut products,
Delivered globally.

FRESH COCONUT

Fresh coconuts harvested at peak maturity, offering natural sweetness and rich hydration. Packed with purity and freshness, perfect for global markets and everyday nourishment.

SEMI-HUSKED COCONUT

Naturally matured semi-husked coconuts, carefully processed to retain freshness and longer shelf life. Ideal for international markets, offering quality, durability, and authentic tropical taste.

FULLY HUSKED COCONUT

Fully husked coconuts, expertly processed for convenience and premium quality. Clean, ready-to-use coconuts delivering natural freshness and rich flavor. Carefully selected to meet global standards for export and everyday use.

TENDER COCONUT

Tender coconuts filled with naturally refreshing coconut water and soft, delicate flesh. Harvested young to deliver pure hydration and a light, tropical taste. A naturally cooling fruit loved for its freshness and wholesome goodness.

COCONUT WATER

Pure and refreshing coconut water, naturally rich in electrolytes and tropical goodness. A hydrating drink straight from nature, known for its clean taste and natural vitality. Perfectly refreshing, delivering the essence of fresh coconuts in every sip.

COCONUT POWDER

Finely processed coconut powder made from premium quality coconuts for rich flavor and aroma. A versatile ingredient ideal for baking, cooking, and food processing applications.

COCONUT OIL

Pure coconut oil extracted from premium coconuts, known for its natural aroma and rich quality. Widely used in cooking, skincare, and wellness for its versatile benefits.

VIRGIN COCONUT OIL

Virgin coconut oil extracted from fresh coconuts using natural processes to preserve its purity and nutrients. Known for its light aroma, smooth texture, and multiple health and skincare benefits.

COCONUT MILK

Rich and creamy coconut milk extracted from fresh, mature coconuts. Widely used in culinary creations for its smooth texture and naturally sweet flavor.

COCONUT CREAM

Thick and luxurious coconut cream made from the finest mature coconuts. Known for its rich texture and naturally sweet coconut flavor.

COCONUT FLOUR

Finely milled coconut flour made from premium dried coconut meat. Naturally gluten-free and rich in fiber, perfect for baking and healthy recipes. A versatile ingredient that adds a subtle coconut flavor and nutrition to every dish.

COCONUT SUGAR

Naturally sweet coconut sugar made from the sap of coconut palm blossoms. Known for its rich caramel-like flavor and natural goodness.

COCONUT CHIPS

Crispy and delicious coconut chips made from carefully sliced premium coconuts.
Naturally flavorful and lightly toasted for a perfect crunchy texture.

DRIED COCONUT KERNEL

Premium dried coconut kernel made from carefully selected mature coconuts.
Naturally rich in flavor and nutrients, processed to retain freshness and quality.
Ideal for food processing, oil extraction, and a variety of culinary applications.

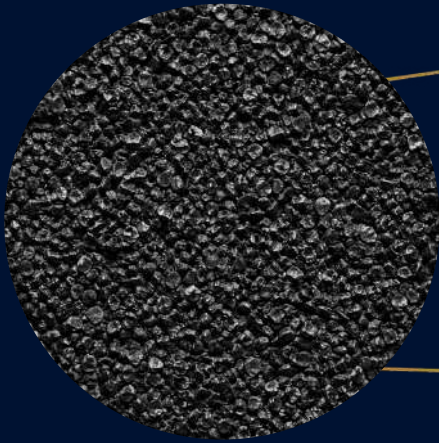

COCONUT SHELL

Natural coconut shells sourced from mature coconuts and carefully cleaned for quality use.
Known for their durability and versatility in handicrafts, charcoal production, and eco-friendly products.

COCONUT SHELL CHARCOAL

High-quality coconut shell charcoal produced from natural coconut shells.
Known for its high carbon content, long burning time, and low ash residue.
Widely used for grilling, shisha, and industrial applications.

ACTIVATED CARBON

Activated carbon made from high-quality coconut shells, known for its exceptional adsorption capacity and purity. Widely used in water purification, air filtration, and industrial applications.

COCONUT FIBER

Natural coconut fiber derived from the husk of mature coconuts, valued for its strength and durability. Widely used in ropes, mats, brushes, and eco-friendly products. A sustainable and biodegradable material ideal for agricultural, industrial, and handicraft applications.

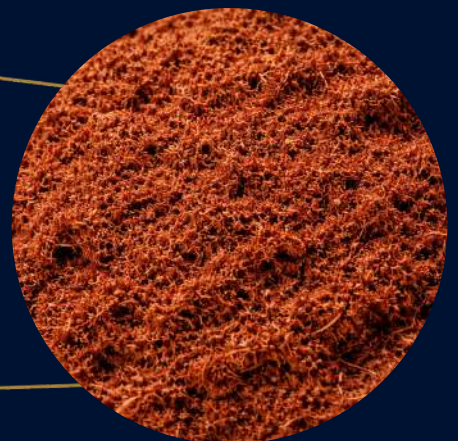

COIR YARN

Coir yarn made from natural coconut fibers, known for its strength and durability. Widely used in ropes, mats, brushes, and eco-friendly products.

COCO PEAT

Coco peat made from natural coconut husk fibers, known for its excellent water retention and aeration properties. Widely used as a growing medium in horticulture, hydroponics, and gardening.

COIR CARPETS

Durable coir carpets crafted from natural coconut fibers, known for their strength and rustic texture. Widely used for flooring, door mats, and decorative interiors.

SPRAY-DRIED COCONUT MILK POWDER

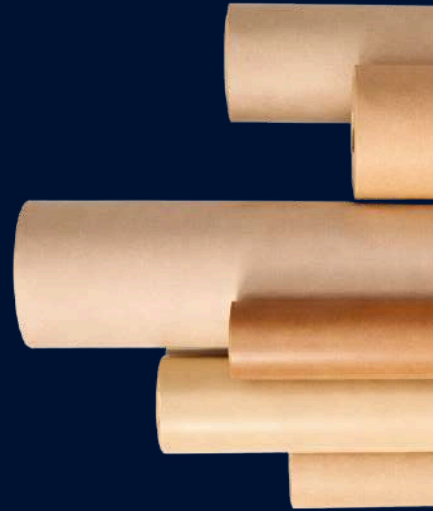

Spray dried coconut milk powder made from fresh coconut milk using advanced drying technology. Known for its fine texture, rich aroma, and excellent solubility.

From raw paper to finished products
delivering excellence worldwide.

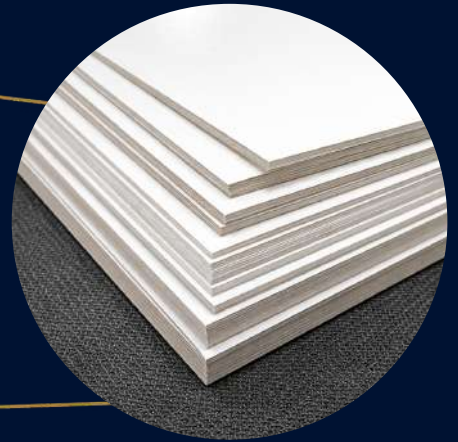

KRAFT PAPER

Premium quality Kraft Paper known for its strength, durability, and eco-friendly composition. Ideal for packaging, wrapping, and industrial applications, it offers excellent tear resistance and reliable protection during storage and transportation. Perfect for sustainable packaging solutions in global markets.

DUPLEX BOARD PAPER

High-quality Duplex Board Paper widely used for packaging, printing, and carton manufacturing. Known for its smooth coated surface, excellent stiffness, and durability, it ensures strong and reliable packaging for various products in global markets.

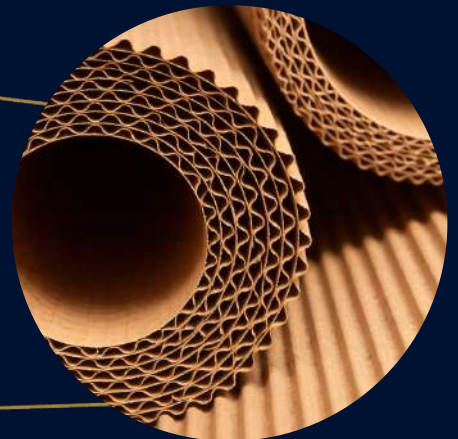

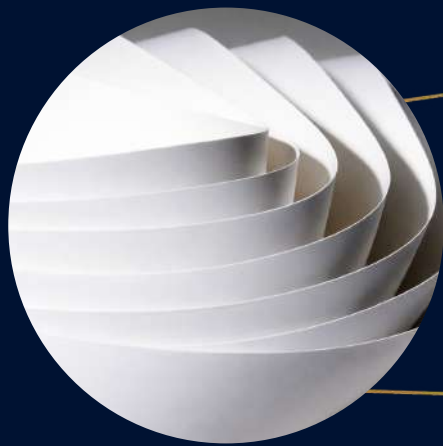

TESTLINER PAPER

High-quality Testliner Paper widely used in the production of corrugated boxes and packaging solutions. Known for its strength, durability, and good printability, it provides reliable protection for goods during storage and transportation.

FLUTING MEDIUM PAPER

High-quality Fluting Medium Paper used in the production of corrugated boards and packaging materials. Known for its excellent cushioning strength and durability.

COATED PAPER

Premium quality Coated Paper designed for high-quality printing and packaging applications. With its smooth, glossy surface and excellent print clarity, it enhances the appearance of catalogs, magazines, and premium packaging.

UNCOATED PRINTING PAPER

High-quality Uncoated Printing Paper widely used for books, office printing, and publishing. Known for its natural finish and excellent ink absorption, it delivers clear readability and reliable performance for everyday printing needs.

A4 COPIER PAPER

Premium quality A4 Copier Paper designed for smooth and efficient printing in copiers, printers, and office machines. Known for its brightness, uniform thickness, and jam-free performance, it ensures clear and consistent results for everyday printing needs.

WRITING AND PRINTING PAPER

High-quality Writing and Printing Paper suitable for books, notebooks, and general printing applications. Known for its smooth surface and excellent ink absorption, it ensures clear readability and consistent printing performance.

NEWSPRINT PAPER

High-quality Newsprint Paper widely used for newspapers, inserts, and publication printing. Lightweight and economical with good ink absorption, it ensures fast printing and clear readability for large-volume publishing.

TISSUE PAPER

High-quality Tissue Paper known for its softness, absorbency, and lightweight texture. Widely used for hygiene and household applications, it offers comfort, durability, and reliable performance for everyday use.

TOILET PAPER ROLLS

Premium quality Toilet Paper Rolls designed for softness, strength, and high absorbency. Hygienic and durable, they provide comfort and reliable performance for everyday household and commercial use.

PAPER NAPKINS

Premium quality Paper Napkins designed for hygiene, convenience, and high absorbency. Soft, durable, and suitable for dining, hospitality, and food service applications.

CORRUGATED BOXES

High-quality Corrugated Boxes designed for strong and reliable packaging solutions. Known for their durability and cushioning strength, they provide excellent protection for goods during storage, handling, and transportation.

PAPER TOWELS

Premium quality Paper Towels designed for superior absorbency and durability. Soft yet strong, they are ideal for kitchen, household, and commercial cleaning applications, ensuring convenient and hygienic everyday use.

PAPER BAGS

High-quality Paper Bags designed for durable and eco-friendly packaging solutions. Strong, reliable, and recyclable, they are ideal for retail, shopping, and food packaging applications.

PAPER CUPS

High-quality Paper Cups designed for safe and convenient beverage service. Durable and hygienic, they are ideal for hot and cold drinks in food service, retail, and hospitality applications.

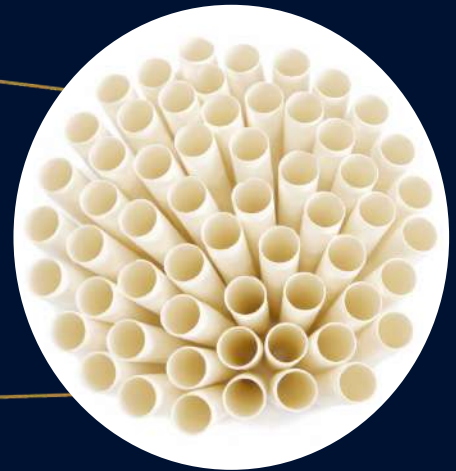

PAPER PLATES

High-quality Paper Plates designed for convenient and hygienic food serving. Durable and lightweight, they are ideal for catering, events, takeaway services, and everyday dining.

PAPER STRAWS

Eco-friendly Paper Straws designed for sustainable beverage consumption. Durable, biodegradable, and suitable for both hot and cold drinks, making them an ideal alternative to plastic straws for food service and hospitality industries.

THERMAL PAPER ROLLS

High-quality Thermal Paper Rolls designed for clear and reliable printing in POS machines, ATMs, and billing systems. With smooth coating and high sensitivity, they ensure sharp print quality and efficient performance.

CARBONLESS PAPER (NCR PAPER)

High-quality Carbonless (NCR) Paper designed for creating instant duplicate or triplicate copies without the need for carbon sheets. Widely used for invoices, receipts, and business forms, ensuring clear and reliable record keeping.

SELF - ADHESIVE LABEL PAPER

High-quality Self-Adhesive Label Paper designed for efficient labeling and packaging applications. With strong adhesion and excellent printability, it ensures clear, durable labels for retail, logistics, and industrial use.

FOOD GRADE WRAPPING PAPER

High-quality Food Grade Wrapping Paper designed for safe and hygienic food packaging. Made from food-safe materials with excellent grease resistance, it is ideal for wrapping bakery items, takeaway foods, and fresh produce.

Quality driven oils and oil seeds for
worldwide buyers

CASTOR OIL

Castor oil is a natural vegetable oil extracted from castor seeds, known for its high purity and rich composition. It is widely used in pharmaceutical, cosmetic, and industrial applications for its versatility and stability.

SESAME OIL

Sesame oil is a natural vegetable oil extracted from high-quality sesame seeds, valued for its rich nutrients and natural aroma. It is widely used in food, cosmetics, and pharmaceutical applications due to its purity and health benefits.

GROUNDNUT OIL

Groundnut oil is a high-quality vegetable oil extracted from premium peanuts, known for its mild flavor and excellent nutritional value. It is widely used in cooking, food processing, and various industrial applications due to its purity and stability.

MUSTARD OIL

Mustard oil is a natural vegetable oil extracted from premium mustard seeds, known for its strong aroma and rich nutritional properties. It is widely used in cooking, food processing, and traditional applications due to its purity and quality.

RICE BRAN OIL

Rice bran oil is a premium vegetable oil extracted from the outer layer of rice grains, valued for its light texture and balanced nutritional profile. It is widely used in cooking and food processing due to its purity, stability, and health benefits.

SUNFLOWER OIL

Sunflower oil is a high-quality vegetable oil extracted from sunflower seeds, known for its light taste and clear appearance. It is widely used in cooking and food processing due to its purity, nutritional value, and excellent stability.

COCONUT OIL

Pure coconut oil extracted from premium coconuts, known for its natural aroma and rich quality. Widely used in cooking, skincare, and wellness for its versatile benefits.

SOYBEAN OIL

Soybean oil is a widely used vegetable oil extracted from premium soybeans, known for its light texture and balanced nutritional profile. It is commonly used in cooking, food processing, and industrial applications due to its purity and versatility.

FLAXSEED OIL

Flaxseed oil is a natural oil extracted from premium flaxseeds, known for its rich nutritional value and smooth texture. It is widely used in food, health, and industrial applications due to its purity and beneficial properties.

NEEM OIL

Neem oil is a natural oil extracted from neem seeds, known for its strong bioactive properties and natural purity. It is widely used in agriculture, skincare, and industrial applications due to its effectiveness and versatility.

COTTON SEED OIL

Cottonseed oil is a refined vegetable oil extracted from high-quality cotton seeds, known for its light texture and mild flavor. It is widely used in cooking, food processing, and industrial applications due to its purity and stability.

PALM OIL

Palm oil is a versatile vegetable oil extracted from the fruit of oil palm trees, known for its rich texture and high stability. It is widely used in food processing, cooking, and various industrial applications due to its efficiency and consistent quality.

SESAME SEEDS

Sesame seeds are premium oilseeds known for their rich flavor, high nutritional value, and natural purity. They are widely used in food processing, bakery products, and oil extraction due to their quality and versatility.

GROUNDNUT SEEDS

Groundnut seeds are high-quality oilseeds known for their rich taste and excellent nutritional value. They are widely used in food processing, snacks, and oil extraction due to their purity and versatility.

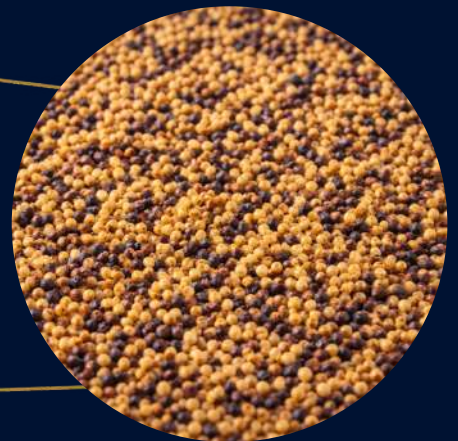

SOYBEANS

Soybeans are high-quality oilseeds valued for their rich protein content and nutritional benefits. They are widely used in food processing, animal feed, and oil extraction due to their versatility and consistent quality.

MUSTARD SEEDS

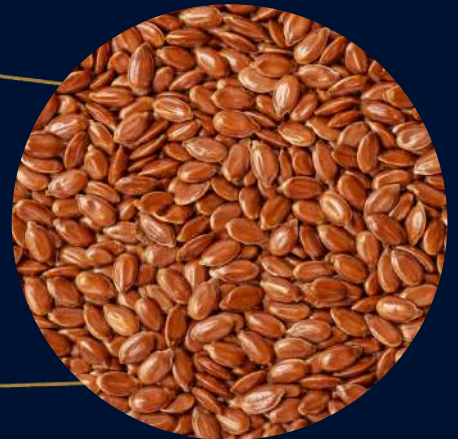

Mustard seeds are premium oilseeds known for their strong flavor and rich nutritional properties. They are widely used in spice blends, food processing, and oil extraction due to their purity and versatility.

SUNFLOWER SEEDS

Sunflower seeds are high-quality oilseeds valued for their mild flavor and rich nutritional content. They are widely used in food processing, snacks, and oil extraction due to their purity and versatility.

FLAX SEEDS

Flax seeds are nutrient-rich oilseeds known for their high fiber and omega-3 content. They are widely used in food products, health supplements, and oil extraction due to their natural purity and nutritional value.

NIGER SEEDS

Niger seeds are premium oilseeds known for their rich oil content and nutritional value. They are widely used for oil extraction, bird feed, and various food applications due to their purity and quality.

CASTOR SEEDS

Castor seeds are high-quality oilseeds known for their high oil content and industrial value. They are primarily used for castor oil extraction, widely applied in pharmaceutical, cosmetic, and industrial products due to their purity and efficiency.

SAFFLOWER SEEDS

Safflower seeds are premium oilseeds valued for their high oil content and nutritional benefits. They are widely used for oil extraction, animal feed, and various food applications due to their quality and versatility.

COTTON SEEDS

Cotton seeds are valuable oilseeds known for their high oil content and nutritional benefits. They are widely used for oil extraction, animal feed, and various industrial applications due to their quality and versatility.

HAND DISINFECTANT THE EFFECTIVE RUB - IN HAND DISINFECTANT

Skin Protecting Substance / Emollients

Direction for Use:

- * Hygienic Hands Disinfection: Rub JV Rub (Twice) 1.5ml or 2 pushes of calibrated pump well over clean, dry hands and nail grooves for 30 secs.
 - * Surgical Hand Disinfection: Rub JV Rub (9ml or 6 pumps), well over clean, dry hands, grooves & upto elbows rub for 1.5 min., keeping the skin moist.
- Advantages**
- * JVRub liquid hand rub, effective against Bacteria, Antibiotic Resistant, Bacteria tubercule Bacillus, Fungi, Viruses, and HCV.

Composition Each 100gm contains:* 2- Propanol I.P 45 gm* 1 - Propanol 30 gm
* Ethyl - Hexadecyl - Dimethyl* Ammonium - Ethyl - Sulphate 0.2gm
(Mecetronium Ethyl Sulphate)

CHLORHEXIDINE GLUCONATE AND ALCOHOL ANTISEPTIC SOLUTION

Composition

- * Chlorhexidine Gluconate Solution I.P. 2.5% V/V
- * Isopropyl Alcohol I.P.
- * With emollients and moisturizer
- * Colours: Carmoisine
- * Direction for use: use undiluted

Direction for Use:

- * For all kinds of first aid, dilute 1 part of JVLON (by vol.) with 3 parts of water (by vol.)
- * Apply prepared solution on the wound by cotton swab.

For Rapid Hand Antisepsis

- * Use 3ml of (2 pushes of dispenser) on clean, dry hands for 30 second for Hygienic Hand Disinfection.
- * Rub 9ml (6 pushes of dispenser) up to elbows for Surgical Hand Disinfection for 1.5 to 3 min.

ETHYL ALCOHOL OR HAND SANITIZER

Composition

- * Ethyl Alcohol DEP 1%IP : 70% V/V
- * PG: 5% W/W
- * Purified Water: Q.S.
- * Colours: Brilliant Blue

Direction for Use: * Hygienic Hand Disinfection. * Hand Rub (Twice) 1.5ml / 2 pushes of calibrated pump * Well over clean, Dry Hands and Nail Grooves for 30sec For Rapid Hand Antisepsis * Ethyle Alcohol Hand Sanitizer effective aganist Bacteria, AntiBiotic Resistant Bacteria, Tubercule, Bacillus, Fungi, Viruses, Incl. HCV.

POVIDONE - IODINE 5% & IODINE IP 10%

Formula * Povidone - Iodine IP 5% w/v or Iodine IP 10% w/v (available Iodine 0.5% w/v)
Purified Water IP Q.S

Indication

* Degerming of skin pre and post operatively for all surgical procedures for the antiseptic treatment of Superficial Wounds, Traumatic Injuries, Burns, vaginal preparation prior to a surgical procedures etc.

Direction For Use

* Should be applied full strength, as often as required, as a paint or wet soak.

Further Information * Ethyle Alcohol Hand Sanitizer effective aganist Bacteria, AntiBiotic Resistant Bacteria, Tubercule, Bacillus, Fungi, Viruses, Incl. HCV.

* It is also active against bacterial spores. In the presence of blood, serum, purulent exudates and necrotic tissue, its activity persits as long as the colour remains. The golden brown colour serves to highlight the disinfected areas.

SURGICAL HAND WASH WITH EMOLIENT AND MOISTURISER

Ingredients

* Chlorhexidine Gluconate Solution
I.P. 20% V/V
* (Eq. to 4% W/V of Chlorhexidine
Gluconate) Purified Water

Application

* As a surgical handwash where prolonged & persistent microbicidal effect is required.

Added Benefits

- * Harmless to skin.
- * Does not cause any dryness like alcoholic handrubs
- * Helps retain moisture level and skin softness.
- * Would not give any stains or marks on skin after application.
- * To be applied pre - operatively on hand, upto forearms.
- * Wet the hands and scrub vigorously for 2 - 3 minutes
- * Wipe with sterile towel after 5 minutes.

POWERFUL ANTISEPTIC LIQUID HEALS WITH SAFETY

Ingredients

* Chlorhexidine Gluconate Solution
I.P. 0.3% V/V
* Strong Centrimide I.P. 0.6% WN
* Eq. to Cetrimide I.P. 0.6% WN
* Colours: Tartrazine & Sunset Yellow

Direction For Use:

- * For all kinds of first aid, dilute 1 part of JVLON (by vol.) with 3 parts of water (by vol.)
- * Apply prepared solution on the wound by cotton swab.

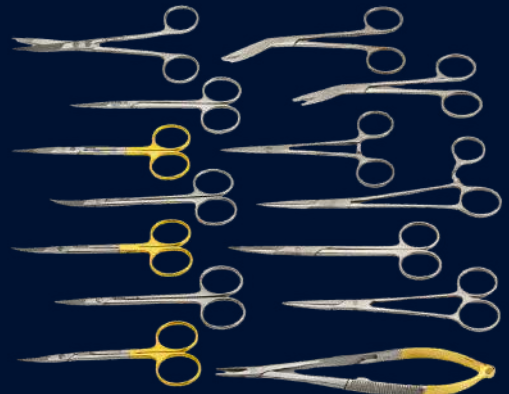

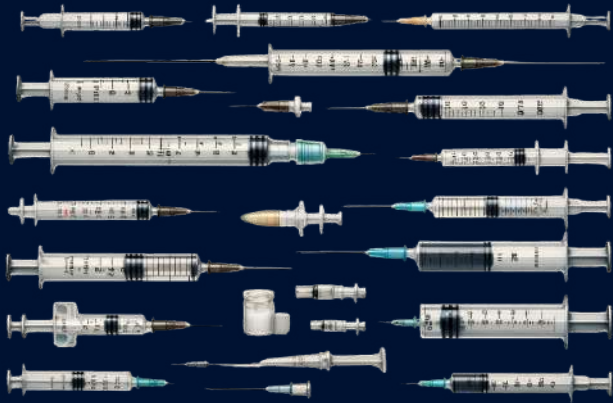

ACTIVATED GLUTARALDEHYDE SOLUTION

Indications * Sterilisation: JV Dex Activated Glutaraldehyde Solution is indicated for use as a sterilant when used or reused, according to the instructions for use for up to a maximum of 14 days at 25°C with an immersion time of at least 10 hours. * High Level Disinfection: JVDex Activated Glutaraldehyde Solution is indicated for use as a High Level Disinfection when used or reused, according to the instructions for use for up to a maximum of 14 days at 20°C with an immersion time of at least 20 hours. Direction For Use * Activation: Activate the JV Dex Solution by adding the entire contents of the activator vial which is attached to the JV Dex Solution container. Shake well when activated, the colour of solution changes to green. Record the date of activation on the space provided in a log book or a label affixed to a secondary container used for the activated solution. Please refer IFU for additional instruction and information regarding activated solution. * Cleaning: Blood and other body fluids must be thoroughly cleaned from surfaces and lumens of devices before reprocessing.

Premium animal feed for Global Markets.

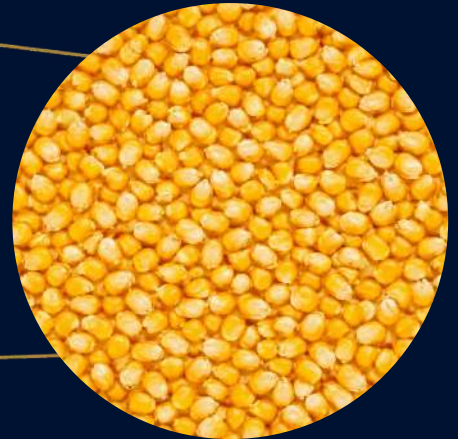

BARLEY

Barley is valued for its uniform grain size, good test weight, and versatile use across feed, malt, and food industries. It is widely preferred by buyers looking for clean, well-processed grain with dependable quality.

MAIZE

Maize is one of the most widely traded feed ingredients, known for its high energy value and broad industrial use. It is commonly used in poultry feed, cattle feed, starch production, and food processing industries.

SORGHUM

Sorghum is a hardy grain known for its excellent feed value and suitability in both food and industrial applications. Buyers prefer it for its adaptability, good nutritional profile, and efficient use in dry region markets.

BAJRA

Bajra is appreciated for its rich nutritional profile and its wide use in bird feed, cattle feed, and traditional food applications. It is especially valued in markets looking for energy-rich grains with strong adaptability.

BROKEN RICE

Broken rice is a cost-effective ingredient widely used in animal feed, brewing, starch processing, and food manufacturing. Buyers often choose it for its easy digestibility, flexible applications, and competitive pricing in bulk trade.

RICE BRAN

Rice bran is widely used in feed formulations for its fiber content, natural nutrients, and economical value. It is a preferred ingredient among buyers looking for balanced feed raw materials for cattle and poultry sectors.

DE-OILED RICE BRAN

De-oiled rice bran is a popular feed ingredient known for its balanced fiber content and suitability in compound feed formulations. It is widely demanded by buyers in livestock and poultry sectors for its economical use and stable nutritional profile.

WHEAT BRAN

Wheat bran is a highly demanded feed ingredient known for its fiber-rich nature and digestibility in cattle and livestock feed. It is commonly used by buyers seeking a cost-effective raw material for feed blending and nutritional balance.

WHEAT MIDLINGS

Wheat middlings are valued in feed manufacturing for their balanced combination of fiber, protein, and energy content. They are commonly used in cattle, poultry, and mixed feed formulations for economical performance.

SOYBEAN MEAL

Soybean meal is one of the most preferred protein-rich ingredients in the global feed industry. It is widely used in poultry, aqua, and livestock feed for its high protein value and consistent nutritional performance.

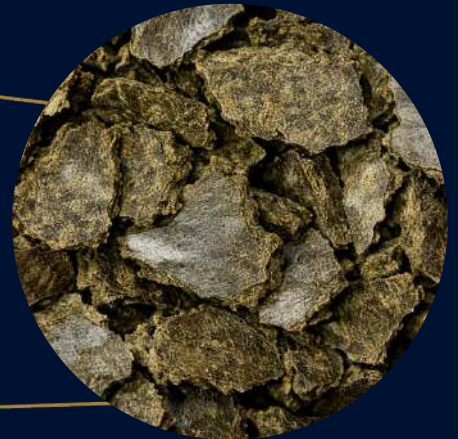

RAPSEED MEAL

Rapeseed meal is a valuable protein source used in animal feed formulations, especially for cattle and other livestock segments. It is chosen by buyers for its affordability, feed efficiency, and dependable nutritional contribution.

MUSTARD OIL CAKE

Mustard oil cake is widely used as a protein-rich feed material and is especially valued in cattle feed applications. Buyers prefer it for its nutritional strength, natural origin, and broad usage in traditional feed formulations.

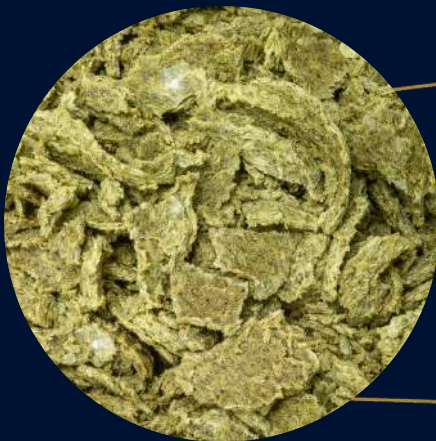

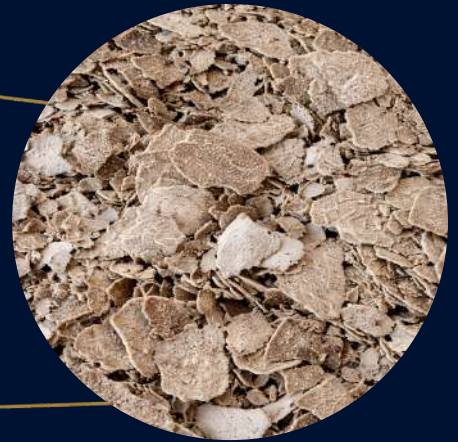

GROUNDNUT OIL CAKE

Groundnut oil cake is known for its rich protein content and strong demand in cattle and livestock feed markets. It is often selected by buyers seeking a nutrient-dense ingredient with good palatability and feed value.

SESAME OIL CAKE

Sesame oil cake is a nutrient-rich feed ingredient valued for its protein content and use in specialized animal feed formulations. It is preferred in markets that seek quality oilseed residues with dependable nutritional value.

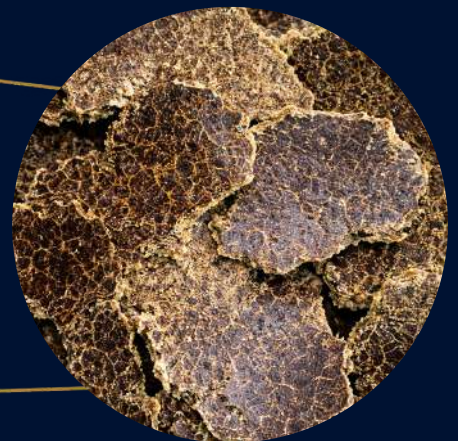

COTTONSEED OIL CAKE

Cottonseed oil cake is widely used in livestock feed for its protein value and practical application in feed blending. Buyers choose it as a cost-effective ingredient that supports bulk feed manufacturing requirements.

CASTOR DE-OILED CAKE

Our castor de-oiled cake is widely used as an organic fertilizer and soil conditioner, valued for its rich nutrient content and natural pest-repelling properties. Buyers prefer it for agricultural applications that support healthy crop growth and improved soil productivity.

SUNFLOWER MEAL

Our sunflower meal is a widely used feed ingredient valued for its good protein content and balanced nutritional profile. It is preferred by buyers in livestock and poultry feed industries for its cost-effective use and dependable performance in feed formulations.

GUAR MEAL

Our guar meal is a protein-rich feed ingredient widely used in cattle, poultry, and other livestock feed formulations. Buyers value it for its good nutritional content, economical use, and suitability in balanced feed production.

CORN GLUTEN MEAL

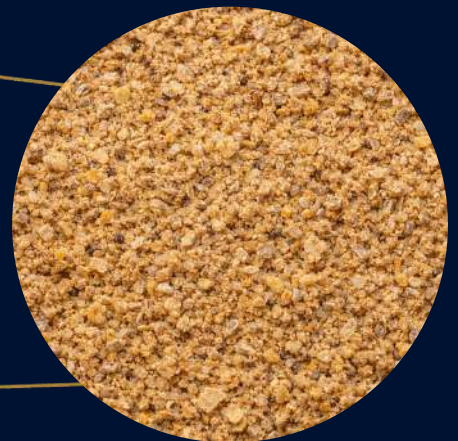

Our corn gluten meal is a high-protein feed ingredient widely used in poultry, cattle, and aqua feed formulations. Buyers prefer it for its concentrated protein content, digestibility, and value in improving feed efficiency.

DDGS

(Distillers Dried Grains With Solubles)

Our DDGS is a valuable feed ingredient widely used in cattle, poultry, aqua, and livestock feed formulations. Buyers prefer it for its high protein, energy content, and cost-effective contribution to balanced feed production. Supplied in export-ready quality, it offers consistent nutrient value, proper processing, and reliable availability for global markets.

ALFALFA HAY

Our alfalfa hay is a premium forage product valued for its high protein content, rich fiber, and strong nutritional benefits in livestock feeding. Buyers prefer it for dairy cattle, horses, and other livestock due to its digestibility and consistent feed value.

MOLASSES

Our molasses is a versatile by-product widely used in animal feed, fermentation, and industrial applications. Buyers value it for its rich energy content, palatability, and usefulness in improving feed intake and processing efficiency.

fssai

Exporting Chemical Excellence.

CAUSTIC SODA

High-purity Caustic Soda (Sodium Hydroxide) for industrial applications, ensuring consistent quality and superior performance. Widely used in textiles, paper, chemicals, and water treatment industries.

SODA ASH

Essential alkaline compound for glass clarity and detergent efficiency.
Optimized for consistent output in large-scale industrial processing.
Supplied in light & dense grades with export-ready packaging.

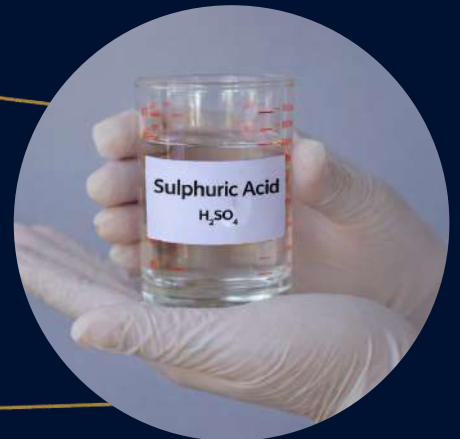

HYDROGEN PEROXIDE

Powerful oxidizing solution ideal for clean, residue-free processing.
Preferred choice for eco-conscious bleaching and disinfection needs.
Handled and packed with strict safety standards for global shipping.

SULPHURIC ACID

A critical backbone chemical driving large-scale industrial operations.
Known for its versatility across fertilizers, refining, and metallurgy.
Delivered with high concentration stability and secure bulk packaging.

NITRIC ACID

Highly reactive acid engineered for precision chemical synthesis.
Key component in fertilizers, specialty chemicals, and metal treatment.
Available in controlled strengths with compliant export packaging.

ACETIC ACID

Versatile organic acid essential for chemical synthesis and industrial formulations.
Widely used in textiles, food processing, pharmaceuticals, and solvents production.
Offered in high-purity grades with secure, export-compliant packaging.

PHOSPHORIC ACID

Multi-purpose acid widely valued for its role in fertilizers, food processing, and metal treatment.
Delivers stable performance in pH control, rust removal, and industrial formulations.
Available in food and technical grades with secure, export-ready packaging.

CITRIC ACID

Naturally derived acid known for its excellent chelating and preservative properties.
Widely used in food & beverages, pharmaceuticals, cosmetics, and cleaning formulations.
Available in anhydrous and monohydrate forms with premium, export-grade packaging.

SODIUM BICARBONATE

Mild alkaline compound valued for its buffering, neutralizing, and leavening properties. Extensively used in food processing, pharmaceuticals, animal feed, and industrial cleaning. Available in food and technical grades with hygienic, export-ready packaging.

CALCIUM CARBONATE

High-performance mineral filler enhancing strength, brightness, and cost efficiency. Widely used in plastics, paints, paper, rubber, and construction applications. Available in coated and uncoated grades with consistent particle size and export-ready packaging.

TITANIUM DIOXIDE

Premium white pigment known for exceptional brightness, opacity, and UV resistance. Enhances durability and finish in paints, plastics, coatings, and inks. Available in rutile and anatase grades with consistent quality and export-ready packaging.

METHANOL

High-purity industrial alcohol widely used as a key feedstock in chemical manufacturing. Essential for the production of formaldehyde, solvents, fuels, and resins. Supplied with reliable purity standards and secure, export-grade packaging.

ISOPROPYL ALCOHOL

Fast-evaporating solvent known for its excellent cleaning and disinfecting efficiency. Widely used in pharmaceuticals, electronics, cosmetics, and industrial applications. Available in multiple purity grades with safe, export-ready packaging.

ETHYL ACETATE

Light, fast-evaporating solvent prized for its smooth finish and low residue. Widely used in paints, coatings, printing inks, adhesives, and pharmaceuticals. Offered in high-purity grades with stable quality and export-ready packaging.

LINEAR ALKYL BENZENE

Key raw material for biodegradable detergents, delivering efficient cleaning performance. Widely used in the production of surfactants for household and industrial applications. Supplied with consistent quality and secure, export-ready packaging for global markets.

SODIUM SULPHATE

Cost-effective filler and processing aid enhancing flow and product consistency. Widely used in detergents, glass manufacturing, textiles, and paper industries. Available in anhydrous and crystalline forms with stable quality and export-ready packaging.

POTASSIUM NITRATE

High-efficiency compound valued for its dual role as a nitrogen and potassium source. Widely used in fertilizers, food preservation, and specialty industrial applications. Available in refined grades with consistent purity and export-ready packaging.

AGROCHEMICALS

Advanced crop solutions designed to enhance yield, protect crops, and improve soil health. Includes a wide range of fertilizers, pesticides, herbicides, and growth regulators. Manufactured to global quality standards with reliable, export-ready packaging.

DYES AND DYE INTERMEDIATES

Vibrant color solutions backed by high-purity intermediates for consistent shade accuracy. Widely used across textiles, leather, inks, plastics, and specialty chemical applications. Engineered for strong color fastness with reliable, export-ready packaging.

PIGMENTS

High-performance colorants delivering excellent opacity, dispersion, and long-lasting stability. Widely used in paints, coatings, plastics, inks, and construction applications. Available in a wide color range with consistent quality and export-ready packaging.

INDUSTRIAL SOLVENTS

Efficient processing solutions designed for superior dissolution, cleaning, and extraction performance. Widely used across paints, coatings, pharmaceuticals, chemicals, and manufacturing industries. Available in a range of grades with consistent purity and secure, export-ready packaging.

SODIUM NITRATE

Versatile oxidizing compound known for its high solubility and stable performance. Widely used in fertilizers, glass production, food preservation, and industrial processes. Available in refined grades with consistent purity and export-ready packaging.

BATH TOWELS

Premium bath towels crafted for superior softness, high absorbency, and long-lasting durability. Designed to deliver comfort and elegance, perfect for global hospitality and retail markets.

HAND TOWELS

Premium hand towels designed for softness, quick absorbency, and everyday durability. Compact and elegant, ideal for hospitality, retail, and personal care use worldwide. Crafted with high-quality fabrics to ensure comfort, hygiene, and long-lasting performance.

FACE TOWELS

Soft and gentle face towels crafted for delicate skin and superior absorbency. Lightweight and quick-drying, ideal for daily use and premium hospitality needs. Designed with high-quality fabric to ensure comfort, hygiene, and lasting freshness.

BEACH TOWELS

Vibrant beach towels designed for maximum absorbency, quick drying, and lasting comfort. Lightweight yet durable, perfect for travel, resorts, and outdoor leisure. Crafted with premium fabrics to deliver style, softness, and superior performance under the sun.

KITCHEN TOWELS

Highly absorbent kitchen towels crafted for efficient cleaning and everyday durability. Quick-drying and lint-free, ideal for both household and commercial use. Designed with premium fabrics to ensure hygiene, strength, and long-lasting performance.

GYM TOWELS

Lightweight gym towels designed for quick sweat absorption and fast drying. Soft, breathable, and compact perfect for workouts, travel, and daily fitness use. Crafted with durable, high-quality fabric to ensure hygiene, comfort, and long-lasting performance.

HOTEL TOWELS

Premium hotel towels crafted for exceptional softness, high absorbency, and long-lasting durability. Designed to meet hospitality standards, offering a clean, luxurious experience for every guest. Engineered with superior-quality fabrics to ensure comfort, hygiene, and consistent performance.

COTTON TERRY TOWELS

Premium cotton terry towels crafted with rich loops for superior absorbency and plush softness. Highly durable and breathable, ideal for everyday use and hospitality standards. Designed with high-quality cotton to ensure comfort, quick drying, and long-lasting performance.

JACQUARD TOWELS

Elegant jacquard towels featuring intricate woven patterns and a refined, premium finish. Soft, absorbent, and durable ideal for upscale hospitality and retail collections. Crafted with high-quality yarns to deliver style, comfort, and long-lasting performance.

EMBROIDERED TOWELS

Premium embroidered towels featuring fine detailing for a sophisticated, luxurious appeal. Soft, absorbent, and durable ideal for gifting, hospitality, and retail collections. Crafted with high-quality fabrics to ensure elegance, comfort, and long-lasting performance.

ORGANIC COTTON TOWELS

Organic cotton towels crafted from sustainably sourced fibers for natural softness and purity. Highly absorbent, breathable, and skin-friendly ideal for eco-conscious hospitality and retail. Designed to deliver comfort, durability, and a premium feel with environmentally responsible quality.

BAMBOO TOWELS

Bamboo towels crafted for exceptional softness, natural antibacterial properties, and superior absorbency. Eco-friendly and breathable, offering a silky feel ideal for sensitive skin and premium use. Designed with high-quality bamboo fibers to ensure comfort, hygiene, and long-lasting performance.

COTTON BATHROBES

Premium cotton bathrobes crafted for exceptional softness, comfort, and superior absorbency. Breathable and durable, ideal for luxury hospitality, spa, and everyday use. Designed with high-quality cotton to ensure a plush feel, lasting performance, and elegant appeal.

COTTON BEDSHEETS

Premium cotton bedsheets crafted for exceptional softness, breathability, and all-night comfort. Smooth, durable, and skin-friendly ideal for hospitality and retail markets. Designed with high-quality cotton to ensure a luxurious feel and long-lasting performance.

BED LINEN

Premium bed linen crafted for superior comfort, softness, and lasting durability. Elegant and breathable, ideal for hospitality, retail, and luxury living spaces. Designed with high-quality fabrics to ensure a refined feel and consistent performance.

PILLOW COVERS

Premium pillow covers crafted for softness, durability, and a smooth, refined finish. Breathable and skin-friendly, ideal for hospitality and everyday comfort. Designed with high-quality fabrics to ensure long-lasting use and an elegant look.

QUILT COVERS

Premium quilt covers crafted for softness, durability, and a refined finish.
Breathable and elegant, ideal for hospitality and modern living spaces.
Designed with high-quality fabrics to ensure comfort, protection, and long-lasting performance.

TABLE LINEN

Premium table linen crafted for elegance, durability, and a refined dining experience.
Soft, absorbent, and easy to maintain ideal for hospitality and everyday use.
Designed with high-quality fabrics to ensure lasting performance and a sophisticated look.

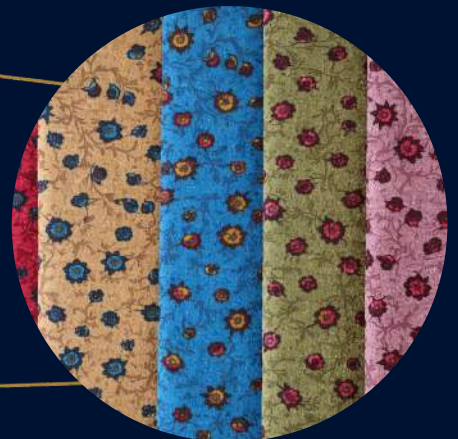

COTTON FABRIC

Premium cotton fabric crafted for softness, breathability, and versatile use.
Durable and skin-friendly, ideal for garments, home textiles, and industrial applications.
Designed with high-quality cotton to ensure comfort, strength, and consistent performance.

PRINTED COTTON FABRIC

Premium printed cotton fabric featuring vibrant designs and a smooth, breathable texture.
Soft, durable, and versatile ideal for garments, home décor, and retail collections.
Crafted with high-quality cotton to ensure colorfastness, comfort, and long-lasting performance.

YARN

Premium yarn crafted for strength, uniformity, and superior performance across applications. Soft, durable, and versatile ideal for weaving, knitting, and textile manufacturing. Engineered with high-quality fibers to ensure consistency, efficiency, and long-lasting quality.

HOME TEXTILE SETS

Premium home textiles set designed for coordinated style, comfort, and everyday functionality. Includes carefully crafted essentials ideal for modern living and hospitality use. Made with high-quality fabrics to ensure durability, elegance, and a consistent premium feel.
